## SUMMARY

Android & Flutter Developer with professional experience shipping native Android apps in Kotlin and Java, and building cross-platform Flutter apps for Android & iOS. Writes maintainable code with MVVM and clean architecture, integrates REST APIs with offline-first storage, and builds responsive UIs with Jetpack Compose and Flutter widgets. A background in IT systems and Linux adds strong debugging and deployment skills.

## TECHNICAL SKILLS

|                     |                                                                                                                                                 |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Android</b>      | Kotlin, Java, Jetpack Compose, XML Layouts, Material 3, ViewModel, StateFlow, Coroutines & Flow, Room, DataStore, Retrofit, OkHttp, WorkManager |
| <b>Flutter</b>      | Dart, Flutter, Provider, Riverpod, BLoC, Sqflite, Hive, http, Dio, Platform Channels                                                            |
| <b>Architecture</b> | MVVM, Clean Architecture, Repository Pattern, REST APIs & JSON, Offline-first caching                                                           |
| <b>Tools</b>        | Android Studio, VS Code, Gradle, Git & GitHub                                                                                                   |
| <b>Other</b>        | Python, Bash, Linux (Ubuntu), Windows Server, Docker, HTML/CSS/JS, PHP, MySQL                                                                   |

## EXPERIENCE

### Android Developer Mar 2022 – Aug 2023

*Vama Communications Pvt Ltd*

- Engineered, tested and shipped native Android applications using Kotlin, Java and Android Architecture Components.
- Applied MVVM architecture for scalable, maintainable and testable codebases.
- Built reactive UIs with Jetpack Compose and reliable offline caching with Room Database.
- Integrated REST APIs with backend engineers and collaborated with designers to deliver stable, performant releases.

### Tech Support Engineer Jan 2026 – October 2026

*Words Worth ELT*

- Provided desktop, remote and network support; automated diagnostics and credential management with shell scripting.

### IT Administrator Jan 2024 – Oct 2025

*Nektor Engineers and Project Consultants*

- Administered Dell PowerEdge servers, Windows Server and Linux; secured the network with SonicWall firewall, VLANs and VPN; managed NAS backups.

## PROJECTS

**Flutter** — [Flutter\\_REST](#) (product listing via REST API), [flutter\\_sqflite](#) (user management with SQLite), [MVVM\\_Flutter](#) (MVVM architecture), [materic\\_terminal](#) (terminal app)

**Android** — [android\\_projects](#), [android\\_samples](#), [kotlin](#); fork of [pulse-sms-android](#)

**Web** — [Employee\\_DPR](#) (timesheet / daily progress report app, JavaScript), [Pok-Chess-Evolution](#) (browser chess game)

## EDUCATION

**Bachelor of Computer Applications (BCA)** — Gujarat University

2022
